

Term Project - Milestone 1

For Milestone 1, you'll submit 1 to 3 **project ideas**. For each idea you should describe:

1. A problem definition (1 to 2 paragraphs, plus an illustrative example)
2. A pointer to two or more papers or textbook sections that describe the problem
3. What evaluation metrics could be used to score system outputs (if applicable)
4. What type of data you will need, and how much data is available

You can find a list of topics from the term projects of 2017 here: https://bxjthu.github.io/CompLing/docs/term_projects.
